Leadership & Technical Experience

Technical Member, DSV Club – BVRIT

- Developed an IoT-based smart agriculture system by integrating temperature, soil moisture, and environmental sensor data.
- Built a web dashboard to visualize real-time sensor readings and monitor field conditions.
- Collaborated with club members on backend integration, database management, and deployment.

Projects

Portfolio Website Live — GitHub

- Designed and deployed a responsive portfolio showcasing projects, skills, and achievements.
- Implemented a modern UI with resume download and contact features.

AI-Data Copilot Live — GitHub

- Built an AI-powered platform for dataset upload, automated cleaning, visualization, and natural language analysis.
- Developed scalable Flask APIs for analytics and file processing.

Awards & Achievements

- Selected to present an innovative project at **Navabharat**, hosted by **IIT Tirupati**.
- Presented the idea **"AI-Based Vegetation Value Detection System"** for estimating vegetation health using AI and satellite imagery.
- Received an official participation/selection certificate from IIT Tirupati.
